New project by Botanica's expert team of top-tier architect and builders, the Hillside offers company's tried and true, popular Thai-Balinese villas in a convenient location.

Botanica Hillside is set on an almost 7-rai plot in Bangjo area. It's a serene place surrounded by tropical nature, yet it remains in a close proximity to Bang Tao beach, with its plethora of dining and shopping options, including Boat Avenue district and Porto de Phuket shopping mall, offering excellent balance of quiet island life and access.

The villas come in 2 types - 3- and 4-bedroom - each featuring spacious living room, open terrace, private swimming pool and sala. Land plots start from solid 471 sqm. All villas are built in Botanica's signature luxury tropical style. The developer since started branching into modern loft and updated tropical style with their new projects, but there is something to be said about the classics.
